981. Time Based Key-Value Error

set(self, key: str, time: int) -> None

get(self, key: str, time: int) -> str

Return a value that was set <= time (the most recent one)
0 1 2 3 4 5 6

```
0  2  4  6  8  9  11
l        m        r        t = 13
            l m r
                l m r    l <= r
                (r) l    l <̶=̶ r

l        m        r    t = -1
l m r
l m r
r l
✗

l        m        r    t = 3
l m r
        l m r
    (r) l
```

nums[m] == t -> return m

t > nums[m]   -> l = m + 1

_   -> r = m - 1

r is the res unless < 0, can't find any element <= t
